## WORK EXPERIENCE

### SWAT Mobility

**Senior Product Designer** — Sep 2023 — Present

Designed and owned features across passenger transport and logistics products in Southeast Asia and Japan. Mentored up to 3 junior designers and defended design decisions with product, engineering and client stakeholders.

***Mixed-model booking flow***

- Reworked Kyushu University's Ito Campus transit app to add fixed route booking alongside on-demand, supporting a service used by 50,000+ riders annually.
- The new fixed-route service saw 80%+ repeat usage among dormitory riders within four months of launch.

***Route Planning and Dispatch Tool***

- Designed key route planning features, including automated order-to-vehicle assignment, manual assignment changes, stop reordering and order splitting.
- The tool supports 10,000+ daily orders across 6+ enterprise clients in Singapore, Thailand and the Philippines, including a major Thai supermarket chain handling 6,000+ orders across 1,000+ vehicles.

**Product Designer** — Jan 2020 — Aug 2023

Designed passenger-facing booking experiences across three mobility product lines: Commute Pass, Digital Fixed Routes and On Demand.

***Commute Pass***

- Designed a recurring employee transport booking flow for regular and rotating shift schedules, allowing rides to follow employees' work patterns automatically; first deployed at Lonza, where the wider service supported 700+ employees daily.
- Adapted the model for Sembcorp Marine during COVID, replacing its monthly pass with shift-based recurring booking; post launch ride booking and management ratings reached 4.3/5.

***Digital Fixed Routes***

- Led passenger app design for V1 and V2 of SWAT's enterprise shuttle booking product, with V2 introducing bulk multi-day booking so commuters could schedule multiple rides at once.
- Delivered the Airline House booking experience for Singapore Airlines and SIA Engineering staff, with passenger numbers increasing 27.8% monthly in the first three months.

***On Demand***

- Surfaced Hakuba's 10% app payment discount at the point of payment, supporting a cashless initiative to reduce driver cash handling and paper fare administration; cashless booking share increased by 33% season over season.
- Expanded booking to support children and wheelchair users for the first time; new passenger types accounted for 19% of completed trips within five months, with wheelchair trips making up the majority of new type usage.

### Multimedia People

**Multimedia Designer** — Sep 2016 — Dec 2019

Delivered 12 interactive installations across Singapore City Gallery (URA), Centre for Ethnobotany Gallery, and Bihar Museum, India.

## EDUCATION

**BA (Hons) Communication Design**
**SIT Scholarship | First-Class Honours**
2016 Glasgow School of Art at (SIT)

**Diploma with Merit in Digital Media Design (Interaction Design)**
2014 Nanyang Polytechnic

## SKILLS

**Design**

Product design · Interaction design · Design systems · Accessibility · Mobile design · Prototyping

**Research**

User research · User flows · Usability testing · Design thinking · Journey mapping · Contextual Inquiry

**Collaboration**

Stakeholder management · Cross-functional collaboration

## TOOLS

Figma · Webflow · Maze · Notion · Illustrator · Photoshop · After Effects · Claude · Figma Make
